Dear Customers,

Industrial Solutions Company, Panasonic Corporation ("we") hereby report that, based on the information provided by our suppliers and the information on parts/materials used in those products, the products below do not contain any of the 201 Substances of Very High Concern (SVHC) listed on the candidate list updated on July, 16, 2019 by the European Chemical Agency (ECHA) above concentration of 0.1wt%.

Product Name : Current Sensing Chip Resistors
Series Name : Low TCR High Power Current Sensing Resistors, Wide Terminal Type

("1) We state "do not contain SVHC" in this letter when certain SVHC is present in Applicable Products in concentration equal to or below 0.1wt % based upon the calculation, subject to (i) the information of SVHC provided by our supplier and (ii) the information of parts/materials used in Applicable Products. We update this report if we obtain information newly.

("2) The view of the Electronic Components Industry is that "diboron trioxide (B$_2$O$_3$)", or "lead oxides (PbO, Pb$_2$O$_3$)" in glass or ceramics are not Substances of Very High Concern. The industry also has the view that "complex oxides containing lead (lead titanium trioxide [PbTiO$_3$], lead titanium zirconium oxide [(Pbx Try Zrz)O$_3$])" in ceramics are not Substance of Very High Concern (SVHC). For more details, refer to JEITA's position statements (24JEITA #207, #247, and #248).
