**Safety Warnings and Precautions**

Please be sure to observe the following warnings. As batteries contain flammable substances such as lithium or other organic solvents, they may cause heating, rupture or ignition.

### Cylindrical type lithium batteries

**Warning**
1. It may cause rupture or ignite.
   ✽ Do not charge, short, (an exception is to pass batteries through dipping solder) disassemble, deform, heat batteries. Do not throw batteries into fire.
   ✽ Do not connect the \( + \) and \( - \) electrodes to each other with metal or wire. Do not carry or store batteries together with a metallic necklace, etc.
   ✽ Avoid inverted connection of \( + \) and \( - \) terminals to devices.
   ✽ Avoid mixed use of new and old batteries or batteries of other series.
   ✽ Avoid direct soldering to batteries.
2. When discarding batteries, insulate the \( + \) and \( - \) terminals of batteries with insulating tape, etc. (see Fig. 1)
   When disposed of improperly, lithium batteries may short, causing them to become hot, burst or ignite.

**Caution**
Keep batteries away from direct sunlight, high temperature, and high humidity.

### Coin type lithium batteries

**Warning**
1. Do not charge, short, (an exception is to pass batteries through dipping solder) disassemble, deform, heat batteries. Do not throw batteries into fire.
2. Do not charge rechargeable batteries with a higher voltage than specified.
3. Keep batteries out of reach of small children. Should a child swallow a battery, consult a physician immediately.
4. When discarding batteries, insulate the \( + \) and \( - \) terminals of batteries with insulating tape, etc. (see Fig. 1)
   When disposed of improperly, lithium batteries may short, causing them to become hot, burst or ignite.

**Caution**
1. Be sure to connect the \( + \) and \( - \) electrodes correctly.
2. Avoid mixed use of batteries, i.e. new, used or different types.
3. Avoid direct soldering to batteries.
4. Keep batteries away from direct sunlight, high temperature, and high humidity.

### Coin type rechargeable lithium batteries

**Warning**
1. Do not charge, short, (an exception is to pass batteries through dipping solder) disassemble, deform, heat batteries. Do not throw batteries into fire.
2. Do not charge rechargeable batteries with a higher voltage than specified.
3. Keep batteries out of reach of small children. Should a child swallow a battery, consult a physician immediately.
4. When discarding batteries, insulate the \( + \) and \( - \) terminals of batteries with insulating tape, etc. (See Fig. 1)
   When disposed of improperly, lithium batteries may short, causing them to become hot, burst or ignite.

**Caution**
1. Be sure to connect the \( + \) and \( - \) electrodes correctly.
2. Avoid mixed use of batteries, i.e. new, used or different types.
3. Avoid direct soldering to batteries.
4. Keep batteries away from direct sunlight, high temperature, and high humidity.

* Discharge circuits will be made by the contact of batteries, which may cause heating, rupture, or ignition of batteries.
