Nickel Metal Hydride Battery

Feb, 2020
Panasonic Corporation
Features

1. Wide range of operating temperature
   Enables to use under severe condition from low to high temperature

2. Eco-friendly
   High recyclable, enables to be repeatedly charged and discharged

3. Suitable for replacing Ni-Cd batteries
   Achieves longer lifetime than Ni-Cd batteries
Nickel Metal Hydride Batteries are mainly used in automotive industry, Infrastructure industry.
*1 1-2 hours (dT/dt value)
*2 Within 1 hour (Step control charge system)
Note: for charge specification, please contact Panasonic.
*3 Standard model: 0-40°C
*4 Approx. 2,000 cycle (under Panasonic recommended charge/discharge condition)
U Infrastructure Backup (Long-life Type)

**Features**
- Long 8-10 operational life
- Excellent recharging performance in high temperature (up to 75°C)
- High rate discharge (3-5It discharge/20°C)
  * BK60AAAHU: Max. discharge current is 1It
- Suitable for replacing Ni-Cd batteries

**Applications**
Emergency lights, guidance lights, LED lights, wireless base stations, severs, elevators, ATM, POS, vending machines, medical devices, etc

---

### Charge Characteristics

*1. 0.2It discharge capacity after charging at 0.1It for 16 hours
*2. Lifespan compared to Panasonic standard type battery life cycle (3-5 years) charged using intermittent charging method
*3. Please consult Panasonic when anticipating usage in operating temperature from 75 to 85°C

Note: 1It(A) = rated capacity (Ah)/(hr.)
H Infrastructure Backup (Standard type)

**Features**
- Long 4-6 years operational life
- Enables to use in a wide range of temperature (-10 to 60°C)
- Suitable for replacing Ni-Cd batteries

**Applications**
Emergency lights, guidance lights, LED lights, wireless based stations, servers, elevators, ATM, POS, vending machines, medical devices, etc

Large-type for Infrastructure Applications

**Features**

- Designed for extra-large power capacity
- Highly efficient power supply even in low temperature
- 5-stage LED indicates remaining battery life (BK-10V10T)

**Applications**

AGV, rail vehicle, wireless base stations, UPS, etc

*1. 0.2lt discharge capacity after charging at 0.1lt for 16 hours

Note: 1lt(A) = rated capacity (Ah)/(hr.)
W Automotive Backup

Features
- Enables to operate in a wide range of temperature (-30 to 85°C)
- Installable in severe conditions because electrolyte solution is aqueous
- Enables to control charge, and easy to do health check

Applications
TCU, eCall, drive recorder, anti-theft security systems, etc

Note: 1lt(A) = rated capacity (Ah)/(hr.)

Efficient discharge in low temperature (-30℃)

Charge characteristics

Discharge characteristics
B Button Top

**Features**
- Long charge/discharge cycle life about 1800 times
- Low self discharge and long storage life
- Excellent temperature resistance especially in low temperature

**Applications**
Electric toothbrushes, electric shavers, remote controllers, etc

---

*1. 0.2lt discharge capacity after charging at 0.1lt for 16 hours
*2. Measured under condition complying with JIS C8708 2013(7.5.1.1). Actual capacity depends on usage condition.
*3. AAA size compatible
*4. AA size compatible
Note: 1lt(A) = rated capacity (Ah)/(hr.)
**N Standard**

### Features
- High safety and reliability
- Wide product range

### Applications
Radios, intercommunication systems, cordless phones, medical devices, etc

Note: 1lt(A) = rated capacity (Ah)/(hr.)

Please use appropriate voltage and temperature management to control battery temperature near the end of rapid charging.
Battery Pack

- When battery packs are installed, the battery type, number of cells, pack shape, and constituent parts are determined by the application. Considerations include voltage and current; charging specifications; available space; and usage conditions. We design and manufacture to the most common industrial applications to best meet customer needs while maintaining safety, quality, and reliability as our central focus.

- Compared to the consumer market, a higher standard of quality and reliability is expected in industrial battery applications, particularly where batteries are intended for vehicles where harsh vibration and huge temperature fluctuations are commonplace. To ensure quality and reliability in this environment, Panasonic selects components for battery packs with utmost care and applies stringent controls for structural assembly and battery production. Suitability for automotive use is evidenced by PPAP (Production Part Approval Process) certification and IATF16949 compliance.
Please feel free to ask a Panasonic sales person.
