Power Inductors

Design and specifications are each subject to change without notice. Ask factory for the current technical specifications before purchase and/or use. Should a safety concern arise regarding this product, please be sure to contact us immediately.

Power Choke Coil Discontinued

Series: PCC-M0630L (MC)

High power, Low loss, Compact size.
Rust proof structure

Industrial Property: patents 21 (Pending)

Features

● Downsize circuit space due to small and low profile package size
● Excellent DC bias performance and high reliability under high humidity
● Reduce number of components by high power and low loss
● Realize excellent performance by capability to high frequency range
● Low buzz noise
● RoHS compliant

Recommended Applications

● Servers, Routers, DC/DC converters for driving CPUs
● Laptop and desktop PC power supply
● Power supply modules

Standard Packing Quantity (Minimum Quantity/Packing Unit)

● 2,000 pcs./box (2 reel)

Explanation of Part Numbers

● PCC-M0630L series

(*1) Measured at 100 kHz.
(*2) Rated current defines actual value of DC current, when temperature rise of coil becomes 40 K.
Performance Characteristics (Reference)

- **PCC-M0630L (MC)**

  - Inductance vs DC Current
    - ETQP3LR33XFN

  - Case Temperature vs DC Current
    - ETQP3LR33XFN

  - Our temperature rise is specified with measurement of single layer PWB (condition A). Please refer to temperature rise curve VS. current for the rated current ($\Delta T=15K$) and Reference value ($\Delta T=40K$). Even when four layer PWB (condition B) is used, temperature rise is different from single layer PWB (condition A). Even we specify the rated current at our condition, the actual temperature rise of PCC may have different result due to thermal dissipation condition. We recommend customers to measure PCC temperature rise at application to confirm it.

Dimensions in mm (not to scale)
