Power Choke Coil  Discontinued

Series: PCC-M0630W (MC)

High power, Low loss, Low-profile

Features
● Small type (7.3×6.6×H3.0 mm)
● High power (5.5 A to 20.0 A)
● Low loss (Rdc : 3.3 to 35.0 mΩ)
● Suitable for high frequency circuit (up to 1 MHz)
● Low buzz noise due to its gap-less structure
● RoHS compliant
● Shielded construction

Recommended Applications
● Notebook PC power supply modules
● Servers, Routers, DC/DC converters for driving CPUs

Standard Packing Quantity (Minimum Quantity/Packing Unit)
● 2,000 pcs./box (2 reel)

*1 Inductance is measured at 100 kHz.
*2 Rated current defines actual value of DC current, when temperature rise of coil becomes 40 K. (Method A)
*3 Rated current defines actual value of DC current, when temperature rise of coil becomes 40 K. (Method B)
*4 Reference only
*5 Method A (PANASONIC's standard measurement conditions).
Method B (high heat dissipation measurement) is different from Method A by the measurement methods.
In normal application condition, the part's temperature depends on circuit design and heat dissipation condition.
This condition shall be verified by the worst operational condition.

Design and specifications are each subject to change without notice. Ask factory for the current technical specifications before purchase and/or use.
Should a safety concern arise regarding this product, please be sure to contact us immediately.
