Item	Contents	Details	
Power cable	For iWNB PC	For details, please contact us.	
Network device	LAN cable	e Use CAT5e or higher grade. In environments that suffer from heavy electromagnetic interference, use CAT6A or higher-grac	
		cable, or STP (Shielded Twist Pair) cable with noise canceling capabilities.	
		Note: Cable types: •Select straight cable when using a network hub. •Select crossover cable when connecting robots directly.	
		* Depending on the hub or PC in use, communication may be enabled regardless of the cable type.	
	HUB	Use a network hub that supports 1000BASE-T or faster.	
		 For connection method, refer to the manual provided with the network hub. 	
Client PC	Supported OS: Windows 10 32-bit version / 64-bit version Web browser: Internet Explorer 11 Monitor resolution: 1920 × 1200 or higher		
IP address	A number identical to that of the robots.		
Network environment	t Communication environment capable of Ping communication (For details, please contact us.)		
Dust-proof rack	To be provided as necessary. Recommendation: A dust-proof of SDS Co., LTD.		
	①For 10 to 30°C environment: E66H (Heat exchanger type) ②For 10 to 40°C environment: E66C-01 (Cooler type)		
IP address Network environment	HUB • Use a network hub that supports 1000BASE-T or faster. • For connection method, refer to the manual provided with the network hub. Supported OS: Windows 10 32-bit version / 64-bit version Web browser: Internet Explorer 11 Monitor resolution: 1920 × 1200 or higher A number identical to that of the robots. Communication environment capable of Ping communication (For details, please contact us.) To be provided as necessary. Recommendation: A dust-proof of SDS Co., LTD.		

*For network environment, although wireless LAN is we recommend wired LAN in terms of influence of noise generated during welding.

- For network environment, although wireless LAN is we recommend wired LAN in terms of influence of holse generated during weiding.
 About personal information Information Security and Personal Information Protection
 Take appropriate action to prevent security risks such as outflow of personal information via this product.
 Change your login password periodically to prevent unauthorized operation of the equipment.
 Easy-to-guess passwords may be figured out by third parties. Set a hard-to-guess password and keep it strictly confidential to prevent leaks to third parties.
 Do not use the same password that you use on other systems or services.
 When entering your password, take care so that third parties may not steal glances at it.
 Take appropriate measures to avoid safety risks and to prevent third parties from illegally using the product, interfering or stopping the use of it.
 Secure the equipment and devices of this product firmly so that they may not be moved or relocated easily.
 Use keys, locks or other means to restrict physical access to the location of the equipment.
 Handle personal information in accordance with national laws and regulations.

	Safety precautions	• Before attempting to use any welding product, always read the manual to ensure correct use.
